## Elevator Pitch

Hello, Brother Thompson

I have been fascinated by art since I was ten years old. In my opinion, art is a way by which people can express their feelings. Art is a work of creativity by which artists deliver great artwork to the world. Such expressions can stabilize people's psychology and relieve stress. I am building this website as a dream come true for people who want to learn about art.

My website is going to introduce all the great pieces of artwork made and discovered by me and my partners. There will be a description for each artwork such as place, artist, and time.

My website also offers a platform to learn about art for people who are interested to learn about art. There are a variety of short-term courses for which people can sign up.

My unique selling proposition is that my website not only offers art exhibitions but it also offers a learning platform for people interested in art. This makes my website stand out compared to other art websites.

Are you ready to enter Hyeonho's world of Art?
